

# Custom Computer Systems by Covenant Computers Etc

As a company, our focus is on building the best computer systems we can at competitive prices, bundling these systems with value added services, then offering the best in customer service. We focus on the entire package because we know that total cost of ownership is more than the money that you put down on a given day to buy a system.

## PRICE

We do not sell \$500 computer systems. There are plenty of places for those who purchase on price only to buy such systems. As I scanned the stores last Christmas to find out what kind of deals were being offered, I found that the systems in that price range were, by and large, entry level systems that were essentially closeouts as the large companies were clearing the shelves of their older technology. We sell quality systems with the latest technology and sell them affordably. Though we do not compete in the \$500 market, we are very competitive in the markets that we do sell in.

## VALUE ADDED SERVICES

We start with the free Windows 7 preassessment where we meet with you for free and assess your current hardware and software to see if there will be issues upgrading from your earlier system to Windows 7. Then we offer free delivery, free setup of your printer, existing Internet connection, applications, and free transfer of data from your old system to your new system. On top of that, add on the longest standard warranty that I know of in the business (18 months instead of 12 months). Without these services, you will spend either time or money to get your computer set up the way you want it. You also may run into surprises as you try to set up your new system and realize that your printer or your older version of Office does not work with Windows 7. We not only deliver systems, we deliver peace of mind.

## CUSTOMER SERVICE

Over the last 16 years Covenant Computers, etc has been known throughout their service area for excellent, timely customer service. No phone calls to India, language barriers, shipping your system across the country, or packing it up to bring it to the store.

In the next few pages you will learn more about our line of computers for 2011. They feature standard Intel based computer systems in addition to Mini PCs, Green PC's, and special configuration systems. We can take any of our configurations and fine tune them to your specific wants and needs.

When buying your next PC we hope that you will consider Covenant Computers, etc.

# COVENANT LOW COST MID TOWER PC

Our Low Cost Mid Tower PC is powerful enough to meet the needs of most home and business. Do not confuse this system with the bargain basement \$500 computers you see in the stores that are closeouts of older technology or built with cheaper components. It is built with quality components from start to finish and includes our standard 18 month warranty, free Windows 7 preassessment, free delivery and free setup.

## THE SPECS

- Your motherboard is guaranteed to be an Intel motherboard. Intel motherboards have an unparalleled reputation in the industry for reliability.
- An Intel I3 processor guaranteed to be at least a 2.93GHz processor
- 4GB DDR3 1333 memory. We don't use bargain priced memory. We only use Kingston, Corsair, or Wintec memory.
- 1TB SATA hard drive. We only use Hitachi or Western Digital drives because we have seen them to be the most reliable drives over time..
- DVD-RW drive
- Memory card reader
- Mouse, keyboard & speakers. We use only Logitech. (Please note that most keyboard makers no longer make keyboards with cap lock and num lock lights. There are no guarantees that your keyboard will have these lights or that we can special order one for you. If we do, it may be a corded keyboard and could impact the cost of your system.)
- Windows 7 Home Premium 64 bit
- 18 month warranty, parts and labor, in house
- Free delivery, setup, application install, printer and Internet setup, data transfer (restrictions apply).
- Free Windows 7 preassessment so there are no surprises when upgrading

## WHY BUY A LOW COST MID TOWER PC FROM US?

Covenant Computers, etc has been in business for 15 years. We have a reputation of honesty and reliability, with an extremely high customer retention rate. We have built hundreds of computers for our customers over the years. Yes, there are less expensive units on the shelf in the big box stores, however, often these units are not the latest technology, are underconfigured, and often are built with inferior components. Large stores are dedicated to the bottom line while reputable independent computer makers tend to be dedicated to building the best computer possible and keeping you as a customer. Below are some of the things that set us apart even from other reputable computer vendors.

- We extend the standard one-year warranty to an 18 month warranty on parts and labor, onsite.
- We save you money by offering free onsite transfer of your data and programs and free set up of your services such as Internet, networking, printing, etc. Restrictions apply.
- We provide a free pre-setup consultation for Windows 7 compatibility. This is very important if you are switching from Windows XP or an earlier version to Windows 7.

As you can see, our price also includes "peace of mind." Please call us or drop us an email to discuss whether a Low Cost Mid Tower PC would fit your needs. Honest, Reliable, Affordable...our Covenant to you.

## COVENANT LOW COST MINI PC

Our Low Cost Mini PC is powerful enough to meet the needs of most home and business users but takes up a smaller footprint than a standard tower (only 10.8" x 5.5" x 12.7" L/W/H). It is perfect for when space is an issue. It is built with the same quality components as our larger towers and includes our standard 18 month warranty and free delivery and setup.

### THE SPECS

- Your motherboard is guaranteed to be an Intel motherboard. Intel motherboards have an unparalleled reputation in the industry for reliability.
- An Intel I3 processor guaranteed to be at least a 2.93GHz processor
- 4GB DDR3 1333 memory. We don't use bargain priced memory. We only use Kingston, Corsair, or Wintec memory.
- 1TB SATA hard drive. We only use Hitachi or Western Digital drives because we have seen them to be the most reliable drives over time..

## IT'S EASY BEING GREEN

To this generation, computers are a way of life. A Green System PC is a great purchase for someone who really cares about the world in which they live and wants to pass that on to their children. Buying a green PC will not save the world, but every little bit helps.

These green systems have Intel's latest I3 technology, Windows 7 64 bit, 1GB hard drives, 4GB of memory, etc

### WHAT MAKES IT GREEN?

Every component in our Green System PC is environmentally friendly in at least one of the following ways:

- It reduces the amount of hazardous materials in landfills.
- It reduces energy consumption.
- It promotes the "quiet computing" initiative.

Can you imagine having a PC that pays you back every month? This Green System PC can lower your PC electrical usage by more than half, depending on your old system. At normal usage this system uses about 60 watts. Under load the system uses 75 watts. These wattages are the same as typical light bulbs. (The "under load" wattage was calculated by running a DVD, downloading a file, and browsing the Internet simultaneously).

Imagine a system so quiet you have to check to make sure that it is running! No more of that constant hum of fans from power supplies, cases and CPU's. Every moving part is specially designed run quietly. Even the computer case itself is designed with dampening panels in addition to other sound minimizing technologies.

### WHY BUY A GREEN SYSTEM PC FROM US?

Covenant Computers, etc has been in business for 15 years. We have a reputation of honesty and reliability, with an extremely high customer retention rate. We have built hundreds of computers for our customers over the years.

Yes, it is true that Green System PCs are more expensive than the typical computer system. The computer is built using specialized components that are more expensive and of better quality than the inexpensive, "off the shelf" computers. At Covenant Computes, etc we understand this dilemma and offer money-saving incentives to offset up the price difference:

- We extend the standard one-year warranty to an 18 month warranty on parts and labor, onsite.
- We save you money by offering free onsite transfer of your data and programs and free set up of your services such as Internet, networking, printing, etc. Restrictions apply.
- We provide a free pre-setup consultation for Windows 7 compatibility. This is very important if you are switching from Windows XP or an earlier version to Windows.

Please call us or drop us an email to discuss whether a Green System PC would fit your needs. Honest, Reliable, Affordable...our Covenant to you.

## PORTABLE BIOMETRIC WORKSTATION

This is one of two Portable Biometric Workstation in use at Dr Menachem Kohen's office in Haverhill, MA.

Covenant Computer's Portable Biometric Workstation is a complete, small footprint workstation with biometric security. It is ideal for small examining rooms or other applications where space is an issue and security is important. A doctor or technician can easily lock the computer system when leaving the room using a single keystroke sequence. Access to the desktop area is accomplished with a fingerprint scan.

### FEATURES

- Biometric security ensures that confidential patient data is safe even when a patient is left alone in an examining room with the workstation.
- Our Covenant Mini Computer System is a small footprint system using the latest Intel ICore technology.
- The onboard battery backup allows the workstation to be moved without shutting it down.
- Its compact configuration includes a mini computer system, laser printer, flat screen monitor, and battery backup system.
- Pricing includes setup, delivery, and training for use of the biometric security system.
- Wireless network connectivity is included.
- Our workstation includes an 18 month warranty, parts and labor, onsite.

The Portable Biometric Workstation is a superior solution to using a laptop. It has the power of a desktop system but is small enough to fit into tight places. It's portable enough to move around the office but without the theft risk of a laptop. If there is a major hardware problem with your laptop it could be gone for weeks. With the Portable Biometric Workstation, most problems can be serviced and repaired onsite the same day. Call us at 978-372-7113 for more information on a Covenant Portable Biometric Workstation.

*Covenant Computers, etc is a local "computer services" company with 16 years of experience. We service business and residential customers in northeast Massachusetts and southern NH. In 2003 Covenant Computers, etc launched their line of quality custom computers 1n 2003 and have built hundreds of computer systems for their customers since.*
